

# ENLARGERS FOR ALL DARKROOMS

## DEVELOPING TABLES / DARKROOM ADVICE / PROFESSIONAL ENLARGERS [WWW.DARKROOMSHOP.COM.AU](http://WWW.DARKROOMSHOP.COM.AU)

Different enlargers are made with different uses in mind so its best to relate the Enlarger to its intended use. For those needing Black & White enlargements to 10x8" the LPL X35 enlarger Kit is well suited. Another Enlarger suitable for small size is the Meopta Student Enlarger. Both LPL X35 and Meopta Student Enlargers come complete with Lenses but Lamps are extra. The same applies to the Meopta Axomat 5 Enlarger. Meopta Axomat 5 will make prints to 35x28 cm on baseboard. Other Enlargers are available for doing Medium Format in Colour or Black and White. Every School Darkroom would benefit from having the LPL 7700 VCCE. This is a Dream Machine for your exhibition B&W prints, with diffused light source it gives excellent print quality and the built in B&W Filters are a great convenience, used in conjunction with density wedge, exposure remains constant with all paper grades. The LPL 7700 VCCE makes prints from 35 mm negatives using 50 mm lens to 50x40 cm in size and 60x50 cm prints from 6x7 cm negatives with 80 mm lens.

### TOP QUALITY ENLARGER AT A SENSIBLE PRICE OPEMUS 6 - COMING SOON

#### W' 50MM LENS BY MEOPTA & G/LESS 35MM NEG CARRIER

The Opemus 6a Black & White is a deluxe version of the Standard model. The advantages are; a taller column (allowing greater magnification), a larger baseboard, extensive lens plain adjustments for the correction of line distortions on your negatives (Sheimpflug rectification). It comes with a metal negative carrier fitted with removable 6x6cm anti newton ring glasses and 4 adjustable light masking blades with an ingenious split line focusing aid and the ability to lock the carrier ajar while still inserted into the enlarger head: enabling rapid negative changes. As with the Opemus Standard the enlarged double condensers will allow the printing of any format up to 6x6cm.

## ENLARGER TIMERS

Timers are available to suit all enlargers and requirements. The least expensive is the Condor Student Timer. This timer is fine for occasional use. For most purposes the Durst Labotim is easy to use and very reliable! This timer has large digital display, making it very easy to see in the dark. For big enlargements and critical focusing some timers have optional SAFELIGHT OFF when focusing and exposing. The extended range, 0.1 to 999.9 sec also make this timer very suitable for murals and poster prints! Condor Timers from Italy are very reliable and easy to use.

### NOVEX DUAL RANGE TIMERS

Exposure times from 0.3 to 60 sec, these are popular in schools.

Single unit - **\$264.00**
